

## **EuPA activities**

*Concha Gil, Jesús Jorrín*

*Report of the EuPA 6<sup>th</sup> General Council (Stockholm, June 14<sup>th</sup> 2009)*

Este artículo aparecerá en el “EuPA Bulletin” (1, September 09) y es indicativo de las actividades de la EuPA y del grupo de personas responsables de su ejecución. Como en el pasado, hay que destacar la presencia activa de proteómicos “patrios”, como indicativo de la valoración que se hace desde fuera de nuestra Sociedad. Como andamos de tiempo justitos, pues eso, que lo dejamos en inglés.

The EuPA General Council (GC) took place during the 3<sup>rd</sup> EuPA Conference.

The Minutes of the 5th GC (August 31, 2008, Siena, Italy) were approved<sup>1</sup>.

The General Council formally approved the action of the Executive Committee with large majority<sup>2</sup>.

Gyorgy Marko-Varga was elected as Vice President of the EuPA. His term of office synchronizes with the presidential term, ending by December 2011.

### **From the EC**

*The GC will request each EuPA member to determine one person to act as co-ordinator in her/his country for EuPA educational activities. It will release an appropriate call*

### **From the CCC**

Close to 23.000 pages are visited each month on average at the EuPA address. Interestingly, more than 50% of the visits come from just 2 countries: Switzerland (32%) and USA (25 %).

All Member Societies are asked to continuously announce national activities of general interest on the EuPA website. Easy contact is possible via Christine.hoogland@isb-sib.ch too.

The Journal of Proteomics could celebrate its first birthday quite successfully. 99 papers were published in 2008 with a rejection rate of 48%. The first real Impact Factor can be estimated not before 2011. The pipeline of Special Issues as specific marketing tools is well filled.

### **From the FC**

Member fee payments together with the payment from Elsevier made up again the major income entries in the recent year, with an important part of it spent for Educational Activities. EuPA should try to establish a closer link with industrial companies supplying equipment and reagents for proteomic research.

### **From the HEIC**

In general, EuPA's visibility in shared activities with HUPO should be increased.
