

DEMANDAS TECNOLÓGICAS

Vida útil del chile fresco

An Italian consortium, made up of producers of chillies, is looking for technologies able to extend the shelf life of fresh chillies, in order to facilitate the marketing of the product and make it available also in foreign markets. The consortium wishes to cooperate under license agreements, commercial agreements with technical assistance and joint venture agreements.

Investigación clínica en insuficiencia cardíaca, sobrecarga de líquidos y edema.

A UK-based SME develops a novel approach for management of fluid overload unresponsive to diuretic therapy. Initial proof-of-concept studies have demonstrated the technology feasibility. The SME is now looking to support further research to evaluate the scalability and are looking to partner with hospitals, universities or research institutions within cardiovascular and/or chronic oedema domains to conduct further research as research cooperation, technical cooperation or services agreement.
